NUMBER 22

Arden V. Piepgrass Passes Away

Arden, 24, son of Mr. & Mrs. Valdemar Piepgrass of Raymond passed away at the Lethbridge Hospital Wednesday afternoon about 1 p.m. from injuries received last Thursday while working on a beet piler at the Reliance beet dump near Taber. He had lain in the hospital nearly a week, conscious, but paralyzed from the shoulders down due to the fracture of a vertebrae which was causing pressure on the spinal cord.

A consultation of a group of doctors on Sunday resulted in their holding out no hope for the injured lad, and they stated that even if he did live he would be a helpless invalid for the rest of his life. He showed slight improvement during his stay in the hospital during the first two or three days, and after that his condition remained practically unchanged until his death.

Funeral services are being held at 2 p.m. today and a full report will be given in next week's issue. The sympathy of the community is extended to the sorrowing parents in their deep loss, and yet they and their friends feel that if the boy could not be restored to health and strength and an enjoyment of his faculties, that his passing is probably a great blessing to all concerned.

The Bee-Hive Girls returned from the outing at Camp Inuspi Saturday reporting a very enjoyable trip and looking forward already to next year's camp.

As we go to press the Flower Show is in progress in the new Card Service Station across the street. The fine array of flowers and vegetables show the results of hours of work and prove what can be done with work and patience.

Bank Of Montreal Crop Report

August 17th, 1939

GENERAL — In the Prairie Provinces despite the fact that prospective yields and grades of grain have been seriously lowered by extreme heat and drought, crops over large portion of both Saskatchewan and Alberta continue promising and wheat yields generally in Manitoba will be fairly satisfactory. In the latter Province harvest is well advanced and in Saskatchewan and southern Alberta cutting is fairly general. Good rains in Manitoba and showers over most of Saskatchewan have delayed operations, but the moisture has been beneficial to late sown grains and pastures. Little precipitation has occurred in Alberta, and crops in central and northern districts would benefit from heavy rains. In Quebec province grain, root and fruit crops have benefitted from good growing weather and all are giving satisfactory promise. Grain cutting is now well under way. In Ontario harvesting is well advanced in most sections and average yields of the main crops are in prospect. In the Maritime Provinces crops in general show good promise, weather and moisture conditions having continued favorable to growth. In British Columbia crop conditions generally continue satisfactory and prospects are for good yields of grains and tree fruits, though in various areas without irrigation water rain is urgently needed. Harvesting of grain will be in

full swing in a few days' time.

PRAIRIE PROVINCES

Alberta—Cooler weather has halted deterioration, but late sown crops need rain urgently. Wheat is ripening prematurely and not filling normally. Harvesting has commenced in the south and will be general over the province next week. Yields and grades will vary widely, but the total wheat crop is expected to be about average. Coarse grains will be light. Southern pastures are in fair condition. Saskatchewan—Wheat cutting is now fairly general, although operations were delayed by light to moderate showers. Present indications are that there will be a wide range of yields and grades. Crops in the southeastern corner are practically a complete failure. In the south central, east central and central regions yields have been seriously reduced by heat and drought. Crop conditions over the remainder of the Province vary widely but prospective yields in this territory are generally satisfactory. Manitoba: While harvesting operations have been delayed by cool, wet weather, cutting is well advanced and threshing has commenced at some points. Crop conditions are variable, but reports indicate that wheat yields generally will be fairly satisfactory. Coarse grains are fair to poor and in some districts crops are being cut for feed. Pastures have improved.

SCHOOL FAIR NEWS

Dear School Fair Chums:

As it is not long until the School Fair, I thought you might like to hear a little about it. First I might tell you it will be on September 14th, in the Raymond Opera House. So many kind people have made it possible for us to have a good fair this year, first the people who have given the prizes, and then the ones who have been willing to spend their time for the fair. The prize list is made into a book and all who wish may have one. And now, boys and girls, please do not ask mother and dad to do your work that you put in the fair, as that is not the proper way to do. Let's play the game for game's sake and not for prizes we may win.

We would like to see every boy and girl have some thing in the fair this year, but you must remember that the boys and girls who go to Olds next summer are not the boys and girls who just make one entry in the School Fair.

We have asked Welling and the other schools to come to our fair and bring their work so as to make ours a bigger and better fair than ever before.

I have a letter from a girl who was at Olds a few years ago, and I wonder if you would like to read it.

So long until next week.

England and France have called up thousands of reservists and Belgium cancelled all military leaves Tuesday when the crisis in Europe was so tense.

Born to Mr. and Mrs. A.W. Jones Saturday, August 19, a baby boy. Mother and son are doing well and happy, and Alvin has the careworn expression off his face now. Congratulations.

Beet Tour In The Taber District

The thirteenth annual demonstration and beet tour of the Canadian Sugar Factories Ltd. was held on Wednesday, the travels being in the Taber and Barnwell districts where some lovely fields of beets were visited and talks given on culture, rotation, irrigation and other phases of this important work. About 150 were on the trip.

The crowd assembled at the Powell loading station and went from there to the farm of Frank Studenka, where Agricultural Superintendent Frank Taylor spoke on "Balancing the Cropping Program." At the L. A. Bullock farm, the owner spoke on "Clover and Summerfallow in Beet Rotation." At the Leith Johnson farm Wm. Valgaardson Taber district fieldman had the subject "Demonstration of Continuous Cropping of Beets and its Damage to Crop and Soil." Then at the Ivan Harris farm, the owner and J. W. Evans, the fieldman for Magrath and Raymond talked on "Canary Crops in Rotation and Good Farm Practices." At the Louis Ham farm Ernest Bennion, fieldman of the Picture Butte district spoke on "Rotations Operated

Successfully Under Tenant Farming." On the W. E. Bullock farm where 100 acres of beets were being raised, the owner spoke on "How I Maintain Soil Fertility for Large Beet Acreage, Alfalfa vs. Sweet Clover for Legume Fertilizer." At the Ralph DeBona farm J. Gerald Snow, fieldman for the Lethbridge district spoke on "Good Summerfallow plus Commercial Fertilizer as a Basis for Beets."

At the Reliance loading station the Roberts Silver piler was explained and the necessity for proper piling of beets to keep them crisp for delivery was stressed. The crowd then proceeded to the Taber River Bridge Park where the Taber Relief Society had a lovely lunch prepared, featuring corn for which that district is famous. During this stop Mayor Evanson of Taber and a representative of the Lethbridge Experimental Farm spoke briefly, and then the tour moved onto the Taber cannery where an inspection trip of the plant from beginning to end concluded an interesting and educational beet tour for the year 1939.

News Notes

Gordon Brewerton of Cardston was here Monday on business.

Roi Stone who has been ill for a couple of weeks with intestinal flu is improving now.

Mrs. G. Hall and children of Cranbrook are spending their holidays with Mrs. Hall's sister Mrs. F.G. Hall.

The Third Deacons Quorum held a weiner roast and party at the coulee east of town Wednesday evening and report a lot of fun.

Messrs. R.W. Ward and Byerstein were here Monday on an inspection trip of the local Treasury branch. Mr. Byerstein was at one time accountant in the Bank of Montreal here.

Fred McDowell of CJOE Lethbridge was in Raymond Thursday arranging a publicity program with the Recorder. Watch these columns for further particulars in future issues.

Mr. Johnson, who was here as assistant in the Treasury branch and then moved to Calgary, is now the Manager of the branch at Cardston, the Cardston manager having been transferred to Edmonton.

Mrs. Bliss Jones of California and Mrs. Pearl Walker of Ogden Utah, have been guests at the home of Mr. and Mrs. O.H. Snow for the past week while visiting relatives here of the Snow and Redd families. They are daughters of Wm. H. Ivins and nieces of the late President A.W. Ivins.

School staffs are nearly complete now. Following are the ten teachers at the High School during the coming term: some of them teaching Public School grades: Principal Lyman H. Jacobs, Melvin T. King, Albert R. Cahoon, Leon Barker, Paul LeBaron, Ronald Folsom, Milo C. Vance, Miss Nancy Evans, Virginia Ririe and Edythe Merrill.

Howard Oliver of Calgary spent the first part of the week in Raymond on business.

Chas. Mehew and Anna Anderson painted the corners and woodwork on Clifford Dahl's new home this week and the fresh colors add to the finished appearance of this fine home.

D.W. Card of Cardston who has done the carpentry work on the S.B. Card's new Service Station, finished his work and returned to his home Wednesday.

Chas. Smith has purchased the Harry King home and added onto it. He and Mrs. Smith moved in their new home the first of this week.

T. Kubota has purchased the old Johnny Wall home on 1st east and 2nd north and is renovating it throughout preparatory to moving into it this fall.

Miss Margaret Dahl daughter of Mr. and Mrs. Ronda Dahl will teach for the coming year in the Castor School district, but she is not sure yet just where her school will be.

Miss Hazel and Master Teddy Allen have spent the past two weeks visiting their Uncle Bob and wife in Medicine Hat. Mr. and Mrs. Thos. Allen took them to the Hat a week ago last Sunday.

The Annual Temple Workers Outing was held at Waterton Park on Wednesday afternoon and a most delightful time is reported. Those attending from Raymond were Mrs. Arthur Dahl, Mr. and Mrs. O.H. Snow and Mr. and Mrs. S.I. May.

The lightweight boxing championship of the world is again held by Len Ambers after his title bout on Tuesday evening in Yankee Stadium with Henry Armstrong who took it away from Ambers last year. The fight went the full fifteen rounds and Ambers won by a slight margin.

Decorotion Day Observed Sunday

NEWS NOTES

Bill Valgardson of Taber, Sugar Co. fieldman was a visitor in Raymond Monday.

Only ten more days vacation before the schools start. Then the kids say "Winter is here."

Joe Beresnak has purchased a new one ton Dodge truck from Hyrum Fromm local Dodge dealer.

The situation in Europe the first part of the week had the usual effect on the market that of sending wheat prices up and stock prices down.

Just as we were printing on Friday, Mr. Wells of the Bank of Montreal brought a huge leaf of Swiss Chard into the office measuring 32 inches in length and 2 inches across. There would have been almost a meal for a person in this one leaf.

Speakers at the Second Ward meeting Sunday evening were Elders Albert Brandley, A. Zau and H. Perrett of Stirling. A piano solo by Marie Dahl and a vocal trio by Mesdames Winnie Strong and Muriel Terry and Miss Dorothy Strong completed an enjoyable and interesting meeting.

Mrs. James E. Anderson entertained a number of ladies Friday in honor of Mrs. E.J. Anderson of Edmonton. The hostess was assisted by her sister Doris Jensen. Those present were Mesdames E.J. Anderson (guest of honor), James Fisher, Frank Holt, T.O. King, L.D. King, Clifford Dahl, B.W. Dow of Magrath, J.E. Anderson and Doris Jensen. Mrs. E.J. Anderson has been visiting her son James and family for the past few weeks.

The Ladies of the Raymond W.I. attended the Fair and Convention held at New Dayton. Two car loads driven by Mrs. H.A. Christie and Mrs. F.G. Hall accompanied by Mesdames A.W. Kirkham, James Fisher, J. Milne, A. Jackson, R. Webster, M. Allred, S. Salmon also Mrs. G. Hall of Cranbrook, B.C. attended the Fair. The ladies brought back a number of prizes won on their year's work everyone enjoying themselves.

Prosperous Farm Community Is Aim Of Line Elevators

IDENTITY OF INTEREST EXISTS BETWEEN FARM AND ELEVATOR

The interest of the Line Elevator Company in the farmer goes much beyond the handling of his grain. The North-West Grain Dealers' Association, some years ago, organized a Public Relations Department under the direction of L. W. Brockington, K. C., one of Canada's outstanding public men. This department has been dedicated to protecting and promoting the interests of its farmer customers.

Much important work has been undertaken by Line Elevators. This includes: advocating continuation of the Wheat Board and the 80-cent price; undertaking a survey of research into industrial utilization of farm products in the United States; advocating establishment of a Western division of

Decorotion Day was observed Sunday, under the direction of the Cemetery Committee. A short program was held in the Second Ward Church at 3 p.m. as follows:

"O Canada" by Choir and congregation, followed by a vocal solo by Miss Alice Court, "I Have Read of a Beautiful City," "Abide With Me" was rendered by Mesdames J.H. Walker and L.D. King and Miss Dorothy Nurse and the Choir sang Kipling's "Recessional" followed by prayer by O.H. Snow.

The meeting then adjourned to the cenotaph where Lee Brewerton read "In Flanders Field" and the Last Post was sounded by Paul H. Redd.

The crowd then went to the cemetery where practically every grave was decorated and the general appearance of the surroundings greatly improved.

At a committee meeting since held, it was decided to try and raise funds to put water at the cemetery so that vegetation can be taken care of better. It is estimated that \$500 will put the water to the top of the hill. There are some funds already on hand and silver tea is to be held soon to add to this amount. All organizations in the Town will be asked to assist in this drive, and see if by spring money is not on hand to do this work.

Frost nipped cucumbers and tomatoes in Cardston gardens last Friday night. It was cool here but we have not heard of any frost.

Mr. and Mrs. Howard Oliver are the proud parents of a baby girl born in the Calgary Hospital August 5th. Howard is proud of the new addition and reports Agnes and the newcomer as doing fine.

The Cardston Rotarians held their Ladies' Night meeting and program on the International launch right on the international boundary on the upper lake of the Waterton chain. Can Mr. and Mrs. O.H. Snow of Middleton gave a very fine talk on "The International Aspect." Mr. and Mrs. S.I. May of Raymond attended the meeting and acting as guests of President J.Y. Card of the Cardston Rotary Club.

The National Research Council to find new industrial uses for wheat and other farm products; financed seed and crop improvement work; financed weed control research; assisted in financing tour of the Tree Planting car; sought a lessening of disparity in prices of products which the farmer has to sell compared with goods that he must buy; proposed that the co-operative associations as members should accept representation on the governing body of the Winnipeg Grain Exchange, and urged Government supervision of the Exchange; continually advocating free international exchange of goods in order to regain and expand wheat markets.

All this is valuable work on behalf of agriculture, and the Line Elevator Companies are to be commended for the part that they are playing in seeking to make the Prairies a better place in which to live.

CANDALISM IS RAMPANT

This week one of the aged and respected citizens told us all most with tears in his eyes of the destruction by boys of his apple tree, not only stealing the partly ripened fruit, but breaking off one of the limbs which was almost as big as his wrist. We heard too that one gardener almost had to sleep in his raspberry patch to protect the bushes from utter ruin because of the plunging and renegade practices of those who came for a few berries. A partly finished house was entered and initials scratched into the plastered walls, and a board moved off the top of partly dry cement and several bunches of initials scratched in the partially dry cement. Another gardener who hobbles on small feet and trees caught a bunch in his orchard in the middle of the afternoon and they almost tore the fences down in their haste to get away.

We hope that some of the guilty parties will read these lin

es and blush when they read them. No one objects to innocent fun, and none of these people whose trees and gardens are ruined by these malicious practices would have denied the visitors a sample of their products if asked for them in a ladylike or gentlemanly manner and waited until the fruit was ready. The thing that hurts is the utter disregard for the rights of other people and the damage done by these raids that are made. The apple tree that was broken up represented years of careful culture and attention. These things do not grow like common trees, they have to be babied and tended carefully. Years of effort was destroyed in a minute when boys of twelve and fourteen years of age climbed out on the limb and broke it off. The same is true of all the damage done by these marauders. They probably call it fun, but their fun costs other people money, and in many cases ruins entirely the beauty of things that should be a source of joy to their owners and others.

It appears that there is some thing lacking in the home teaching and training of youth for them to carry on these things. Surely the commandment "Honour Thy Father and Thy Mother" is not carried out when such practices are indulged in. Boys and girls are not bringing any honor to their parents when they indulge in pranks that

cause other people expense, disappointment and anger against not only the offenders, but also their parents, and they wonder what upon their heads should come. We hope that we have said enough that our youngsters will stop damaging and destroying fruit trees and bushes that have taken so many years to cultivate and bring to a state of bearing. We hope that parents will encourage children to respect the rights of others and to assist in encouraging the growing of that which is useful and beautiful. It is discouraging enough with blight, frost, drouth and a hundred and one other things to produce fruit of any kind here, and then on top of all that to have them wilfully broken and destroyed will break any one's heart. There is protection under the Criminal Code against such doings, but after all convictions do little good, they are costly and it is not only always the guilty are apprehended. It would be far better for parents, one and all to get their children to respect other people's property and if they did this, and resolved to do no more damage of this sort, our town would soon become a real beauty spot.

We think this end is well worth working for.

THE WEEK IN EDMONTON

From Alberta Publicity Bureau
Edmonton, August 21.—State ment of British Trade Commissioner Frederic Hudd, in Calgary that the recent Alberta oil mission to Great Britain had been "highly successful" in attracting British interest in Alberta oil has been received in Edmonton with some gratification. Mr. Hudd worked with the delegation, headed by Hon. N. E. Tanner, while they were in Britain.

"Alberta is in a position as good as any province in Canada with regard to the British market," Mr. Hudd told Calgary Board of Trade members. "Diversity of your products places you in a favorable position. There's an unlimited market for Alberta oil in the Old Country if it can be made accessible and economically feasible."

Headed by Jasper, where he will see the wonders of Alberta's great mountains playground is Sir John Reith, Chairman of Imperial Airways and a former British Broadcasting Corporation chief executive. In Montreal Wednesday Sir John conferred with C.N.R. president Hungerford and Philip Johnson, general manager of the Trans-Canada Air system, and he said afterwards that an Imperial T.C.A. liaison had been tentatively drafted.

It was not announced whether the visitor is to confer with Lord Tweedsmuir, who was in Edmonton last week-end and later left for the North. But for some months there have been persistent rumors in British political circles to the effect that Sir John Reith may be Canada's next Governor General. He was connected with British Broadcasting from 1922. Prior to that he was in charge of munitions contracts in the United States and in 1919 was in charge of the liquidation of munitions contracts for the Ministry of Munitions.

Re-statement of last year's policy in respect to priority of security on seed grain lines has been announced by Hon. Solon E. Low, Provincial Treasurer. "We are prepared to recognize the priority taken covering farmers supplied by vendors to farmers," he said. Object of the policy is to remove all curtailing influences from farmers who may need more seed and twine in order to get in the crop. Usually, seed grain lines take priority.

Alberta workers have received \$17,418 in back wages collected for them by the Board of Industrial Relations, Hon. E. C. Manning stated this week. The sum covers the 1939 operations of the Board. During the year, a total of 626 workers were assisted, of whom 492 were male and 134 were female. All had

been receiving less than the prescribed minimum wage as laid down by provincial legislation according to Clayton Adams, chairman of the board.

Edmonton will welcome Sir Percy Everett of London on August 22nd, and at the airport to greet him will be a guard of honor composed of 20 Wolf Cubs—their seniors being absent at camp. Sir Percy is assistant to Lord Baden Powell of Gilwell, Chief Scout, and he is touring Canada in the interests of the Boy Scout's Association.

Announcement that W. F. Knode Texas oil engineer who was engaged by the provincial government on the recommendation of the U.S. Bureau of Mines is not now chairman of the Conservation Board was made by Hon. N. E. Tanner this week. Mr. Knode's contract expired on June 30 and for the time being, the Board will carry on with the two remaining members C. W. Dingman and F. C. Cottle. Mr. Knode has gone into private practice but will act as advisor to the board.

In Calgary, the Provincial Treasurer, Hon. Solon E. Low Hon. N. E. Tanner gave assurances to the civic housing committee that the government is prepared to legislate so as to protect all private and public loans advanced for the building of homes in Alberta. They are prepared to discuss with the executive council the advisability of passing an order in council giving protection to private individuals who wish to lend money for home building.

The legislation, if passed, will remove all doubt on the part of institutions which so far have not permitted Albertans to participate in the Dominion Housing plan. Despite reports that mortgage loans have been restricted only in recent years, it has been pointed out that Alberta daily newspapers in 1935 carried stories in which mortgage men stated definitely that no new loans on property had been advanced for the four year's previous.

School books for the coming year will be sold at rock bottom prices, states W. H. Noble, director of the government school book branch. Seventy-five per cent. of books listed in the official catalogue are optional or reference books, he stated. Students will be allowed to select most of their own texts under the new educational policy, only a small number being required reading.

Opening of the government farm implement repair shops in Calgary, Lethbridge, Red Deer and Edmonton has been warranted by the volume of business done to date, it was stated here today. While government has obtained rights of manufacture of certain parts in Alberta it was added that no foundry work would be done this year in the province, but that wooden parts such as Linder slats will be made.

Department of Agriculture officials are interested in the announcement that new strain of fall rye has been perfected in Saskatchewan. Named Dakota 23, the first distribution of seed is being made now, according to Prof. J. B. Herrington of the University of Saskatchewan field husbandry dept.

First Edmonton Convention of the New Democracy party was held Monday last when Orvis A. Kennedy, sitting Social Credit M. P. and two other Social Credit workers were named pro-candidates. Final selection of the candidate, in accordance with the provincial league's constitution, will be made by an advisory committee consisting of zone presidents, it was stated at the meeting.

Mrs. Roxie Robbins spent this week visiting relatives and friends in Raymond.

Kendall's shop has been a busy place the past couple of weeks with building of grain boxes for both new and used trucks. Harvest makes busy times for nearly everyone.

As It Stands Now

The European situation is still a puzzle. Germany insists on her demands being met in Poland or she is going to enforce them.

Poland has nearly two million men under arms and refuses German suggestions for settlement.

France is daily strengthening Maginot line and her other frontiers, and advises Parisians who can do so to leave the city.

England has given the Cabinet dictatorial powers and industries can be taken over by government immediately if necessary.

Japan angry over Berlin Moscow pact. Spain feels free to throw her support either way.

If England declares war, Canada will follow suit and whole Dominion put on war time basis and industries taken over when and as necessary.

THE FRIENDLY PHILOSOPHER

The trouble with you, I says to the depot agent, is that you talk too much. In fact that's the trouble with most folks. I remember when my hired man went for a buggy ride with Hank Wilson's hired girl. She didn't look so bad in the moonlight, and after they'd rode along for awhile without nothin' bein' said, my hired man says "Marry will you marry me?" "Yes," she says. The hired man didn't say nothin', and they rode along for quite a spell in silence and then Hank Wilson's hired girl jabbed my hired man in the ribs with her elbow and says, "Why don't you say something?" "Seems like there's been too much said already," says my hired man. If he'd had a flashlight along with him, says the depot agent, he would of been able to look before he leaped. You're changing the subject I says, but since you mention it, a flashlight would have thrown a lot of light on that matter. I know mine has got me out of a lot of tight spots. Anybody that's smart will have a flashlight with him every time for an emergency. Yessir.

THE CANADIAN WHEAT BOARD

5,000 Bushel Limit on Deliveries of 1939 Wheat

REGULATIONS

1. No person shall sell to the Board wheat which was not grown on the farm or farms which such person owns or operates, or to the product of which such person is otherwise entitled.
2. Every person who sells wheat to the Board in breach of the foregoing regulation shall be guilty of an offence and punishable on summary conviction by a fine not exceeding one hundred dollars or by imprisonment for a period not exceeding one month.

PROVISIONS FOR ESTABLISHING THE SYSTEM OF DEALING IN WHEAT UNDER THE CANADIAN WHEAT BOARD ACT FOR THE CROP YEAR 1939-40, MORE PARTICULARLY WITH REFERENCE TO THE 5,000 BUSHEL LIMIT.

RULES AND INSTRUCTIONS

The Canadian Wheat Board will buy 1939 wheat during the crop year 1939-40 on the following basis:

1. The sale of 5,000 bushels at the fixed price is the limit of benefit which a grower may derive from the Canadian Wheat Board. In addition to buying wheat from the Board, a grower may buy wheat from landlords, vendors, mortgagees, or others entitled by contract or operation of law to wheat grown by someone else. If any person from whom the Board is entitled to buy wheat sells less than 5,000 bushels of wheat to the Board, wheat grown on the same farm or group of farms operated as a unit may be purchased by the Board from any other person from whom the Board is entitled to purchase wheat, but the Board will not buy more than 5,000 bushels of wheat grown on any one farm or group of farms operated as a unit. The Board will not limit the Board may buy more than 5,000 bushels from a landlord, vendor, mortgagee or other person so entitled.

ILLUSTRATION A.—The Board may purchase from each grower-producer not more than 5,000 bushels of wheat grown by him in the crop year.

ILLUSTRATION B.—Where a grower-producer sells 5,000 bushels of wheat grown on one farm or group of farms operated as a unit, the Board will not buy from any landlord, vendor, mortgagee or other person entitled as aforesaid any further wheat produced on such farm or group of farms.

ILLUSTRATION C.—Where there is a mortgage on the farm and the owner-grower sells to the Board 3,000 bushels of wheat grown on that farm, then the mortgagee can sell to the Board only 2,000 bushels of wheat grown on that farm.

ILLUSTRATION D.—Where in such circumstances there is a landlord or a vendor, as well as a mortgage, the total sales of the landlord or vendor of mortgagee can only be 2,000 bushels.

ILLUSTRATION E.—Where a mortgagee receives 2,000 bushels of wheat grown on each of 10 farms, and in each case the owner-grower sells 3,000 bushels of wheat to the Board, the Board may buy the whole 20,000 bushels from such mortgagee.

ILLUSTRATION F.—Where land is leased, the tenant-grower and the landlord will be treated in the same manner, respectively, as the owner-grower and mortgagee in the above illustrations.

ILLUSTRATION G.—Employees and dependents are not grower-producers and they cannot sell wheat to the Board themselves or through anybody else, unless a grower hires employees by a contract based on crop shares instead of money wages, in which case grower and employees respectively will be treated in the same manner as owner-grower and mortgagee in illustrations above.

ILLUSTRATION H.—If two farmers actually farm in partnership and each is entitled to a share of the crop and neither is a dependent or employee of the other, each is a producer of his share of the crop and will be treated in the same manner as a grower-producer in illustrations above.

2. Difficult cases may arise in applying the 5,000 bushel limit on purchases of wheat in certain cases, such as where one man owns a number of farms which are operated by relatives or dependents, or where a number of persons operate farms under an arrangement such that the wheat they grow is sold by a community organization. In such cases the Board will have to exercise discretion in the light of the general principles illustrated above.

Questions have been raised regarding the right of an owner-grower and mortgagee under item (c) in clause 1 of the Rules and Instructions above. This, of course, is merely an illustration like all the others and the amounts mentioned are by no means binding in individual cases.

Regarding priority between themselves, of grower, landlord, vendor, mortgagee and other persons entitled to wheat, the Board cannot concern itself with the rights of these various parties between themselves. They must make their own arrangements. No doubt in some instances at any rate the relationship will be governed by the terms of the lease, mortgage or other agreement between them.

Further enquiries should be directed to

THE CANADIAN WHEAT BOARD
423 MAIN STREET WINNIPEG, MANITOBA

BUDDING OF APPLE AND PLUM TREES

A description of some of the work being done by the gardeners on the Station during the month of August might be of interest to some of our readers. It is at this time that budding of our apple and plum stock is done. Grafting is done at another season of the year.

The seed is planted a year previous and the seedlings are about one foot to two feet high when the budding is carried out. Varieties of apples and plums do not come true from seed, so any particular variety must be propagated by either grafting or budding. One of our gardeners has furnished the following description of the method of inserting the bud from the particular variety desired. This is as indicated below, inserted an inch or two from the ground and the following spring the seedling is cut off an inch or so above the bud and the new tree is started from this single bud.

In the process of budding the bud sticks are taken from the current year's growth. The leaves are all cut off as soon as the bud stick is removed from the tree. If the leaves are left on they quickly draw out the plant

liquids and leave the stick dry and practically useless. A half-inch stub is left on the bud stick when the blade is removed, this facilitates handling and placing the bud. The budding men have found it of extreme importance to keep the bud sticks moist after they have been cut from the tree by carrying them in a container of water or in wet rags.

When the budder selects his bud sticks he chooses the strongest growing shoots, those on which the buds are plump and firm, possessing a mature appearance. The buds near the tip and base of the shoots are generally discarded.

The young seedling is cleaned of all basal branches to afford a clean area low on the trunk for placing the bud. A T-cut is then made by making the transverse cut first and then drawing the longitudinal cut an inch long up to the former. The incision is never made deeper than the bark, the wood under the bark must be left smooth. The two flaps formed by the T-cut are rolled back with the back of the knife and the bud slipped into place.

The bud is cut by holding the stick with the buds pointing to the worker's body, placing the thumb of the knife holding

hand below the bud stick, and drawing the knife upwards well below the bud. The small particle of wood left under the bud is slightly removed from the bud by rolling the bark back. The bud is then ready to insert in the T-cut on the seedling.

After the bud is in proper position, it is firmly tied with a rubber band. It is of greatest importance that the bands be fresh and springy. With the rubber band, it is used to tie the bud in place by starting at the bottom, stretching it, winding it around the loose end and continuing to wrap it around until there are two or three turns of the rubber band above the bud and the loose end is tucked under the last loop. Care is taken to prevent wrapping the rubber band over the bud, but only the bark above and below it.

Covering the bud after it is tied with thin grafting wax or melted paraffin is a good practice, particularly in a dry season as we are now experiencing. The wax prevents the bud from drying out before it unites with the stock.

Edmonton Letter

Edmonton, Aug. 21—Decision as to when there will be a general election in Alberta rests in the final analysis with Herr Adolf Hitler. Premier Aberhart is waiting for Prime Minister King to declare an election date for the Dominion and in his turn Mr. King is awaiting Herr Hitler's decision as to whether there shall be war or peace in Europe. And thus, Herr Hitler controls the hands of Herr Aberhart in Alberta when it comes to an election. Mr. King holds the balance of power between them apparently.

This week will see the fourth celebration of 'Democracy Day' in Alberta, but it will be the 'New Democracy Day' this time. What it will be next year depends on the outcome of an election or no election. It was considered last week almost certain that Premier Aberhart would announce the date of an election in the province, when the "twenty thousand" or so faithful gather to hang on his thunder at St. George's Island or elsewhere, but at the time of writing this it does not appear likely the Premier will do more than deliver one of his customary talks of preparedness. "Be prepared" is the "New Democracy" watchword, and it is likely to be stressed loudly on Tuesday, this week.

An interesting development sprang to the fore during last week when the Communists in convention in Edmonton, announced they had left the "New Democracy" ship not to return. At least the Communists are consistent as democrats, they decline to have some "advisory board" set up to dictate to them who shall be selected as their candidate for election in an autocratic manner. Mr. Jan Lakeman, Communist leader, was nominated as candidate for one of the Edmonton riding seats when the election comes, but in accepting nomination he declared the "New Democracy" party was not representative of all progressive groups, it was "just an addition to the Federal Social Credit party."

This action of the communists makes it look bad for Premier Aberhart's former song

leader in the Edmonton Prophet is Bible Conference, Orvis Ken ney, M.P., who at the time of his election to the East Edmonton seat in parliament, in company with Hon. Lucien Maynard with loud and fulsome praises thanked the Communists for helping elect the Social Credit victor. What will Kennedy do this coming battle of ballots with his Communist supporters absent or opposed is a question many Edmonton people are asking.

During last week the Alberta government issued its quarterly financial statement for the period ending June 30th last. The statement is simply and solely a cash statement and therefore cannot give any real indication as to what the trend of the government's financial operations and position is. The statement points out that the funded and unfunded debt has been reduced by \$5,110,038 since March 31. The money for this purpose was made available by the final payment of \$5,580,000 on the sale of the Northern Alberta Railway under an agreement made by the U.F.A. government almost ten years ago. So that in reality the credit for this goes to the previous government.

If the government had observed the law of the Dominion and had met the interest payments on its bonds honestly in accordance with the terms under which the province's debt was contracted, the provincial treasury would be very far from balancing its revenue with expenditures. It has continued withholding payment of fifty per cent of the interest due on its bonds despite the fact that the provincial law under which this is done was declared by the courts beyond the legal powers of the province.

In an effort to induce financial companies such as the mortgage corporations to advance money for home building in Alberta, the provincial government through its financial mouthpiece Hon. Solon E. Low, provincial treasurer, announced that legislation will be passed to protect private and public loans advanced by either individuals or companies for building homes in the Province under the Dominion Housing scheme.

At Calgary during the past week officials of the loan companies and mortgage companies declared they were not interested in such legislation now. The lack of interest is declared due to the record of the government during the past four years in ignoring its obligations. Financial institutions cannot be expected to depend on the word of when the government has repeatedly defied federal authority and ignored its own obligations, is the view often heard from members of mortgage companies and those connected with the financial interests. It becomes clear, every day that Premier William Aberhart's government is not regarded with confidence in quarters where the prosperity of the realm lies.

MIDSUMMER FLOWERS

(Experimental Farms Note)

When the peonies and iris are over, there seems to be a lack of flowers in many gardens, states Isabella Preston, Division of Horticulture, Central Experimental Farm, Ottawa. This need not be as there are many easy grown perennials that bloom early in July. Delphiniums are well known and seeds of good strains give many fine seedlings or named varieties can be obtained from nursery men. A medium tall blue flowering plant that is very showy, is *Nepeta grandiflora* var. *Sourcier d'Andre Chaudron*. This has larger flowers of brighter blue color than *Nepeta Mussini* foliage. *Veronica* is another plant with blue flowers that is useful. Some are dwarf but of the taller ones, *V. Teucrium* blooms in late June and its spikes of bloom are borne in great profusion. *V. longifolia* blooms later but is also worth

NEWS NOTES

growing.

Where lupins thrive new Russell varieties should be tried. They can be grown from seed and will bloom the first season if started early. The colors are varied and beautiful, and if the seed heads are cut off the plants bloom for several weeks.

Hemerocallis or Daylilies are showy plants that are easily grown. There are a number of varieties and several including Middendorffii, a light yellow, and Orange Man, a rich yellow, bloom early in July. *Anthemion* and *A. Sancta-Johannis*, an tinctoria lemon yellow daisy orange one, both have finely cut foliage and make a good show in a border.

The *Chrysanthemum*, generally called *Pyrethrum* or *Painted Daisy* has fern-like foliage and daisy-like flowers in shades of pink and red. These make useful cut flowers as they last well in water. These are just a few plants that are easy to grow and

Twenty seventh Treasury Branch has been opened in the province, bringing the number nearer to the announced objective of 50. The new Branch is at Vermilion, and opening ceremonies were conducted by Hon. W. A. Fallow and Hon. Solon E. Low.

Public debt of Alberta was decreased over five million dollars from March 31 to June 30 last, according to the quarterly financial statement issued by the Treasury. The report also shows that for the three month period ended June 30 the over-all cash surplus on income account excluding new borrowings, debt redemption, and final instalment received from sale of the northern railways shows a decrease of \$434,829.52.

-THE WOMAN WHO KNOWS ABOUT FISH

CREAMED FISH
Cover fish with water, bring to boiling point and simmer for a few minutes until fish is cooked—use top of stove or oven. Drain fish, place on hot platter with small pieces of butter on top. Return to oven to heat. Just before serving add 1/2 cup cream or whole milk heated. Do not let fish remain too long or cream may curdle. Garnish with parsley.

She has solved the daily problem... because FISH offers a welcome and wholesome change at mealtimes, something the whole family will like. There are over 60 different kinds of Canadian Food Fish and Shellfish from which you can choose, either fresh, frozen, smoked, dried, canned or pickled. All of them can be served in an infinite variety of recipes. And... one of the good things about FISH is that it is nourishing, and so easy to prepare! Serve Fish to your family often.

THE BIG DEPARTMENT STORE

THE CANADIAN WHEAT BOARD

In this issue, we are printing an advertisement of the Canadian Wheat Board respecting the 3,000 bushel limit on deliveries to the Board. Every farmer and land-owner should read these instructions carefully, so that all risks of offending the Act will be avoided.

It will be noted that every person who sells wheat to the Board in excess of 5,000 bushels and in breach of the regulations set out in the advertisement is guilty of an offence and punishable on summary conviction by fine or imprisonment. It is the earnest hope of the Wheat Board that wide publication and understanding of these regulations will prevent any infringement of the law and that all producers will cooperate to this end. The Board will have inspectors checking deliveries at the elevators and farms to assist in administration of the Act.

Any farmer or other person entitled under the Act to wheat grown on a farm who is in doubt regarding his position in inviting to write to the Board submitting full details regarding his case.

HE WOULDN'T WEAR THEM OUT

Jones sent \$2.00 to a concern that advertised to send for that sum five pairs of hose by mail. When they arrived he looked them over and then wrote the senders: "Hose arrived. The patterns are vile. I wouldn't be seen on the street with them on. Back came the answer: "What are you kicking about? Didn't we advertise that you wouldn't wear them out?"

When you buy hose advertised in the Raymond Recorder you'll be glad to wear them any place because you know the Raymond merchants will stand behind the goods he sells.

For Sale—Five Roomed house and lot. Block east of Broadway. See W. W. Rodeback.

CIVIL SERVICE NOTES

Next time you have trouble in deciding which new maid or hired man to put to work, imagine having the task of examining some 50,000 persons in more than 1,000 competitions for positions as widely different as editor and entomologist, or test pilot and seamstress. Then you will have a keener conception of part of the annual work of the Civil Service Commission at Ottawa, the Dominion's employment agency.

Naturally the same yard stick cannot be used to measure the capacities of those applying for such a wide variety of positions as is found in the Government Service. The Commission has to size up each situation and decide what form of examination will give the best results. The candidate might be faced with a written, oral or practical test, or a combination of these. Or he might not be faced with any of them; for a very satisfactory examination for technical positions is one in which a Board looks over the application forms, references, and careers of the candidates and arranges them in order of merit, either with or without a subsequent oral examination—or competitive interview as these examinations are called in the British Civil Service.

Whatever the form of examination used in its competitions, the Commission is concerned first with getting as many qualified persons as possible to apply, and second in arranging them in their proper position of merit and assigning them for duty in order from the eligible list.

Central Motors of Cardston delivered a Chevrolet one ton and a two and a half ton heavy duty truck to S. B. Card and Son on Thursday. Card's old truck went to Ray Meldrum of Magrath to complete the deal. G. Hacking of Cardston put these deals through.

(SIGNED) —A. B. BLRERRR
The report that the judges were unable to read the signature of the successful architect for the new Dundee art college recalls the classic story relating to a medical man's prescription: After receiving the medicine, the patient used the prescription for years as a railway pass, twice as an invitation to a dance, once as an invitation to society wedding, and later as a letter from his employer instructing the cashier to raise his salary. And in the evenings his daughter played it over on the piano.—Edinburgh Dispatch.

Line Elevators Do More Than Handle Your Grain

Line Elevators are continually guarding the interests of their farmer customers.

The Public Relations Department of the North West Grain Dealers' Association under the direction of Mr. L. W. Brockington, K. C., follows closely the actions and proceedings of all Governments and commissions which may be dealing with matters relating to grain. Every effort is made before these bodies to protect and promote the interests of our farmer customers.

Some of the constructive work undertaken by Line Elevators in recent months follows:

Took an active part in the work of the Bracken Committee in urging upon the Dominion Government the continuation of the Canadian Wheat Board and 80 cent wheat

Urged the Dominion Government to establish a Western Research Laboratory of the National Research Council. This laboratory would seek new uses and expanded markets for wheat and other farm products. This proposal was put forward following a survey which we made of the progress in research into new uses for farm products in the United States.

Financed seed and crop improvement work.

Financed research extending over a period of several years into Weed Control and eradication.

Our material financial support makes possible the tour of the Canadian Forestry Association's Tree Planting Car throughout the Prairie Provinces.

Continually advocating free international exchange of goods in order to regain and expand Canada's exports of wheat.

Continually endeavoring to impress on Governments and public bodies the disparity between the basic price at which the farmer sells his products compared with the price he pays for manufactured farm requirements which he must buy.

Proposed that Co-operative associations, as members should accept representation on the governing body of the Winnipeg Grain Exchange and urged appointment of a supervisor for the Grain Exchange.

You ask, "Why does my local Line Elevator do these things?"

We reply: Only through a prosperous and happy agricultural community can we prosper. Our interests are identical despite what is said by propagandists.

Line Elevators Association
